

Declaration of support

I, **Mario Cortese**, Deputy Innovation Manager of R2M Solution have been mandated by the **board of R2M Solution srl** on **8 march 2022** to support the Clean Energy for EU Islands Initiative

We share the ambition to support island communities to enhance their wellbeing and resilience by assisting them in realising their transition to clean energy resources.

Specifically, my organization will work towards:

- Supporting the members of the Clean Energy for EU Islands Initiative with its expertise and experience;
- Ensuring relevant and accurate advice for the island communities to proceed with their Clean Energy Transition Agendas, and subsequently with their decarbonisation plans and financing concepts;
- Supporting exchanges and share knowledge, experiences, best practices, tools or resources relevant to the members of the Clean Energy for EU Islands Initiative;
- Promoting the Clean Energy for EU Islands Initiative, mobilising existing and potential new members of the Clean Energy for EU Islands Community;
- Collaborating with other Support Organisations of the Clean Energy for EU Islands Initiative to strengthen islands communities, and foster their joint and coordinated clean energy action.

Being aware of the leading role of the islands' Transition Teams, we are ready to put our specific expertise and experience at the service of the islands' full decarbonisation.

The EU wide Islands Community acknowledges the importance of having a strong and responsible network of Support Organisations to push forward the clean energy transition. As an official member of the community we, therefore, abide by our common rules of good netiquette and principles as described on www.euislands.eu.

The path towards full decarbonisation of EU islands requires concerted action and a collective effort, and we are delighted to join the Community of committed EU islands and Support Organisations to manifest that a clean energy future for EU islands and beyond is possible.

Mario Cortese
