Editorial

Dear EU islands community,

Autumn has started, the leaves are turning, and the EU island secretariat is focusing on all events that are now taking place. If you have missed the introductory event of the Island Marketplace, you can find all the information and a link to the recording below. The same goes for the Croatia edition of the Clean energy for EU islands Energy Academy and our participation in the 19th European Week of Regions and Cities that we took part in with our friends from NESOI.

What else? Our technical team has worked hard on the technical solution booklet, which gives you a perfect overview of all energy technologies suitable for islands – do have a look!

And last but not least, the legal team has finalised its questionnaires to explore the legal and regulatory barriers and opportunities concerning the energy transition on EU islands. Please take a moment to fill in our survey.

Stay in touch, and all the best!

Your EU islands team

Clean energy for EU islands initiative

Greetings from the Islands - Here Are the Winners!

After receiving many beautiful submissions from islands all over Europe, the Clean energy for EU islands secretariat has chosen the winners of the Call for Postcards "Greetings from the Islands".

Barriers? What Barriers?

The Clean energy for EU islands secretariat focuses on legal and regulatory barriers that EU islands face in energy transition and implementation of clean energy projects. The regulatory analysis aims to understand the current state of things, including main barriers and propose potential solutions to accelerate the energy transition.

Explore, Shape & Act: The Story

Remember our two girls Sophie and Anna? From the solar farm that they passed to Sophie's grandma, it was not a long way to cycle. Anna was surprised when she saw the house. Yes, it was old, but Sophie's grandma had it retrofitted with new windows, solar panels on the roof and insulated to make it cosy in the winter and not too hot in the summer. Grandma lives alone in her house and she proudly shows the girls all the things she has done to make her home more environmentally friendly.

Oh, we nearly forgot to mention that Anna and Sophie already met some of grandma's neighbours who were visiting at the same time to discuss an important

issue!

Stay tuned for the next episode!

Events

Islands at COP26

During COP26, Island Innovation is going to present an "Island Space" where they will share key insights and developments related to remote, rural and island communities. Through their global network, they will help to connect the COP26 conversation to a truly global audience!

date

01/11/2021 - 12/11/2021
