Clean energy for EU islands

Call for technical assistance

info@euislands.eu

EU Islands invited to apply for our Call for Support series

The Clean energy for EU islands Secretariat is launching a first Call for Support this April, calling EU islands to apply for technical support for their projects.

The Clean energy for EU islands secretariat continues to offer support to European islands to further advance in their clean energy transition. From formulating strategic energy transition plans to grid integration studies, regulatory analysis, or help finding financing for concrete projects: this technical support aims to bring solutions to all European islands tailored to whichever phase of the transition they are in.
