

Energía Bonita:

La Palma's energy community

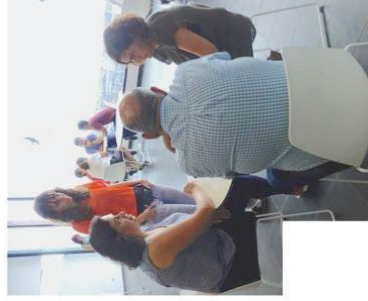

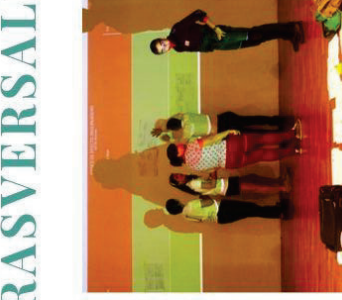

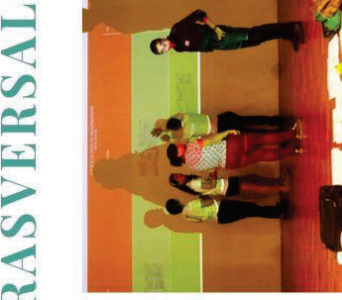

# The birth of an energy community

## TALLERES SECTORIALES

## TALLERES TRASVERSALES

# Identity, values and principles

- **New energy model**, new energy culture: decentralized, in citizens' hands and rooted in the territory
- **Not for profit** and respectful with the environment and people
- Prioritization of **energy poverty** and promotion in **diversity**
- **Gender equality**

Ethical banking

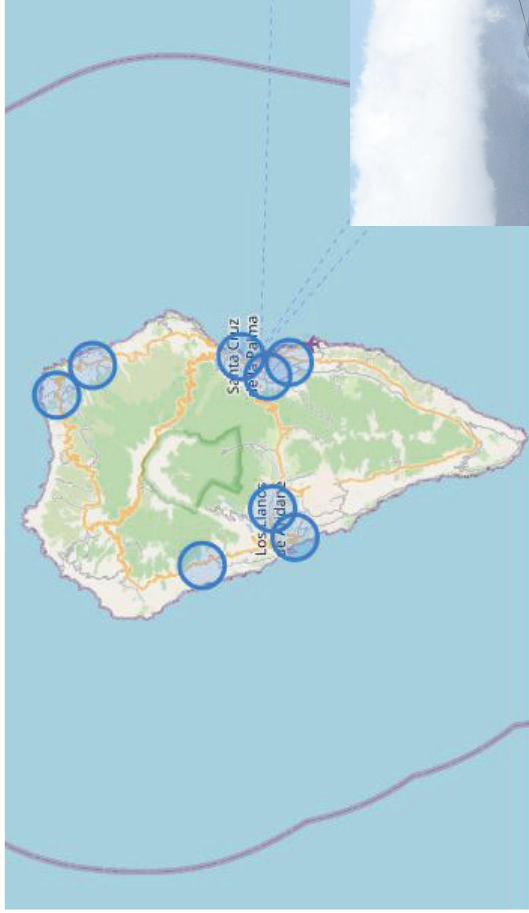

Open Source Software

# Energy principles

- Prioritize **savings and efficiency** before new energy generation
- **Minimum environmental impact** (no occupation of non anthropozized ground, photovoltaics and other technology)
- **Supply chain**: materials manufactured as close as possible, best quality and duration warranty, ethics and traceability when possible
- **Solidarity** principle: everyone pays same for the same service

# What are we doing?

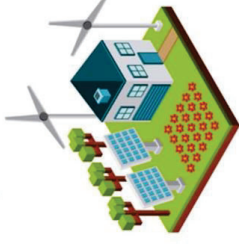

# Subsidies and other aid

Energy Poverty

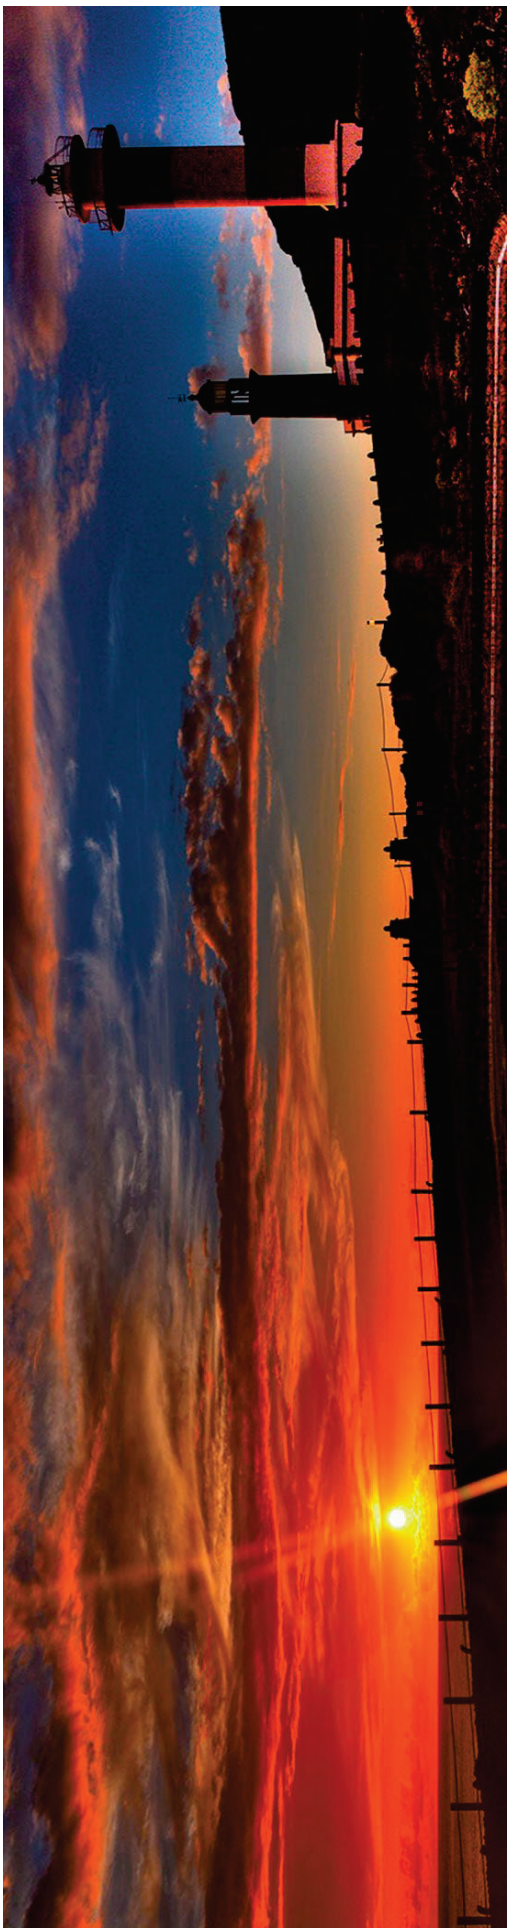

Shared self consumption  
and electric carsharing

# Barriers

- Material and human resources
- Administrative and bureaucracy
- Financial
